Foodie

Stage 5: Heuristic Evaluation

Project by:
52515, Alexandre Nascimento
52985, Joana Pacheco
52699, Lourenço Vasconcelos
52585, Marta Cerqueira

**Lab class Nº:** 2
Group Nº: 14
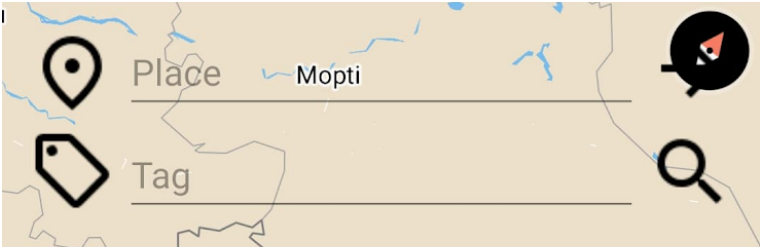

Professor:
Teresa Romão

December 5, 2020

Nº	Problem	Heuristic	Description	Severity	Solution	Screenshot
1	Search and tag bar background	8. Aesthetic and Minimalist Design	The map background isn't plain, making readability hard	Minor	Using a high contrast background (ex. white)	*Image1
2	Compass behind search arrow	8. Aesthetic and Minimalist Design	If we rotate the map, a compass is displayed and it overlaps the arrow icon	Minor	Change the compass position (for example to the bottom right corner above the tabs bar)	*Image2
3	Add button in the main page doesn't work	1. Visibility of System Status	After pressing the add button in the main page nothing happens	Catastrophic	Implementing the feature	*Image3
4	Tab bar color and element distribution	8. Aesthetic and Minimalist Design	The color of the tabs bar contrasts in an unpleasant manner with the ocean and the black icons on top of it. There's also an unbalance in element distribution on the tab.	Cosmetic	Add a tab bar element in the empty region of the tabs bar and change the color	*Image 4
5	Search button in the main page doesn't work when searching for Lisbon (scenario 1)	1. Visibility of System Status	After pressing the arrow to search for a place nothing appears to happen or change in the application	Catastrophic	Implementing the feature	*Image 5
6	Help button in the main page doesn't work	1. Visibility of System Status	After pressing the help button in the main page nothing appears to happen or change in the application	Catastrophic	Implementing the feature	*Image 6
7	Confusing toast after pressing the email button on the profile	9. Error reporting, diagnosis, and Recovery	After pressing the email button on the profile page an error message	Cosmetic	Replacing the message with something like "feature not	*Image 7

|			appears saying "Replace with your own action" which leaves the user confused		implemented"	
8	Map pinned points information	4. Consistency & Standards	The information that pops up when clicking on a pinned point doesn't match the location. Additionally very little information is displayed (only an image and a name), which doesn't include any information about lens and filters as suggested	Major	Providing more and the correct information	*Image 8

Additional comments

We could only search for specific locations (such as "Porto" and "London"), unabling us from fully performing any of the scenarios.

Dates

Our project was sent to our colleges on the 30th of November, and we received the project from our colleges on the same day.
